C. Write a three-paragraph essay with around 300 words.

Topic: Most people believe that advanced technology results in a non-qualified educational outcome. Do you agree with this statement? Provide three reasons you agree or disagree with the statement.

Essay

I would disagree with this statement because, while technological advancement can negatively affect the educational field of an individual, it could also bring about a prosperous outcome as well. When talking about the effect of advanced technologies' effect on education, it is most likely that the subject referred to are smartphones/laptops and the internet. While it is true that internet and smartphones can be an object of great distraction to a child's education, it is also true that both can be extremely useful for a lot of educational purposes.

Technologies like smartphones/laptops has undoubtedly changed the way that students studies and the way that teachers teach. Software like Microsoft word, PowerPoint, Canva, Photoshop, Scholars etc. are powerful tools used to create projects and assignments in a very short amount of time. Meanwhile, the internet allows for students and lecturer alike to connect and discuss projects, topics and issue assignments through the form of video-calls, voice messages, messages or files. It also provides us with a gateway to billions of data and information in the form of webpages, e-books, podcasts, tutorial videos, official education pages etc. Combining both of these two together essentially creates a tool that can enable an individual to teach themselves almost anything.

It is also worth-noting that, with the recent social distancing situation of Covid-19 has brought out the usefulness of advanced technology and showed us that while there are negatives, the positives far outweigh the negatives. Without these inventions, students would've had no chance or way to study from their homes. Websites/Apps like Google classroom, Meet, Zoom, Canva etc. has given us a gateway to connect while being miles apart from one another.
